KIDNAPPED App (overview 1)

- The Kidnapped App is an App for your Smartphone designed to protect you and help in when activated from being attacked or kidnapped.
- The APP hides on your phone in order to protect you.

KIDNAPPED App (overview 2)

- **The Kidnapped App has 5 modes:**
 - Standby
 - TEST
 - Alert
 - Travel
 - Kidnapped
- **STANDBY-** Once the phone is on and the APP is installed it is in Standby.
- **TEST -** Once the App is installed please TEST the system and learn how to use the APP.

- **ALERT-** Use this **MODE** when danger is near and you can capture evidence about the threat. It will convert to **KIDNAPPED MODE** after 10 minutes or when you activate it.
- **KIDNAPPED** – Activate this **MODE** when you at risk then hide your phone and focus on your escape the **APP** is protecting you now.

SAFE, SECURE, SECRET & SILENT

KIDNAPPED App (overview 4)

- Your Profile is long and involved and critical to your safety. Certain sections of the Profile are highly confidential.
- Your Contacts receive their own APP to help in your rescue.
- You need to set up your RESPONDER, this is the TEAM that will respond when you are KIDNAPPED.
- Be CLEAR when setting up your Profile.

The App is activated in both the **ALERT** and **KIDNAPPED MODES**, this means your **CONTACTS** are notified and data starts to be transferred for your protection.

Your **CONTACTS** will receive:

- Your location on a map.
- Recent Pics, Videos, Phone Log and Audio clips.
- Data will be transferred as long as the Phone has power and the **APP** is active.

1 App is actually 2 Apps (1 is 2, 1)

The Kidnapp App has 2 components:

- USER App is downloaded onto the **USERS** phone, then the Profile is completed and Contacts added.
- CONTACT App is delivered to and used by your **CONTACTS**. They can not see you or receive data until you activate the Alert or Kidnapped **MODES**.

1 App is actually 2 Apps (1 is 2, User)

The USER App is loaded onto Smart phones and has an easy to use menu and set up.

- There are 5 Operational Modes,
 - Standby/Test/Alert/Travel & Meeting/Kidnapped
 - TEST the APP, practise with it please.
- It automatically sends the Profile and data to your Contacts when activated.
- It disappears from your phone to protect you.
- It silences your phone.
- IT can be partnered with other phones (a back up phone) and tracking devices.

1 App is actually 2 Apps (1 is 2, User)

The USER App allows you to be prepared for all RISK levels.

- Alert Mode is used when you sense you are in danger but you can gather video data of your enemy. **USE WITH CAUTION**, Alert Mode will become Kidnapped Mode
- The Travel/Meeting Mode is activated **BEFORE** you travel or enter a high risk meeting or do something high risk.
 - It will go into KIDNAPPED Mode automatically unless you intervene. This offers automatic protection for you with no further interaction needed.

1 App is actually 2 Apps (1 is 2, 3)

- The **USER App** transmits to the **RESPONDER App** & other **Contacts**:
 - Pictures/Audio/Video & Text
- All can be **CRITICAL** as evidence and data to reduce the risks in the event of:
 - Personal attacks & thefts
 - Larger disasters, armed assaults, bomb threats etc.
 - Personal Crisis (acts as a campus 911)

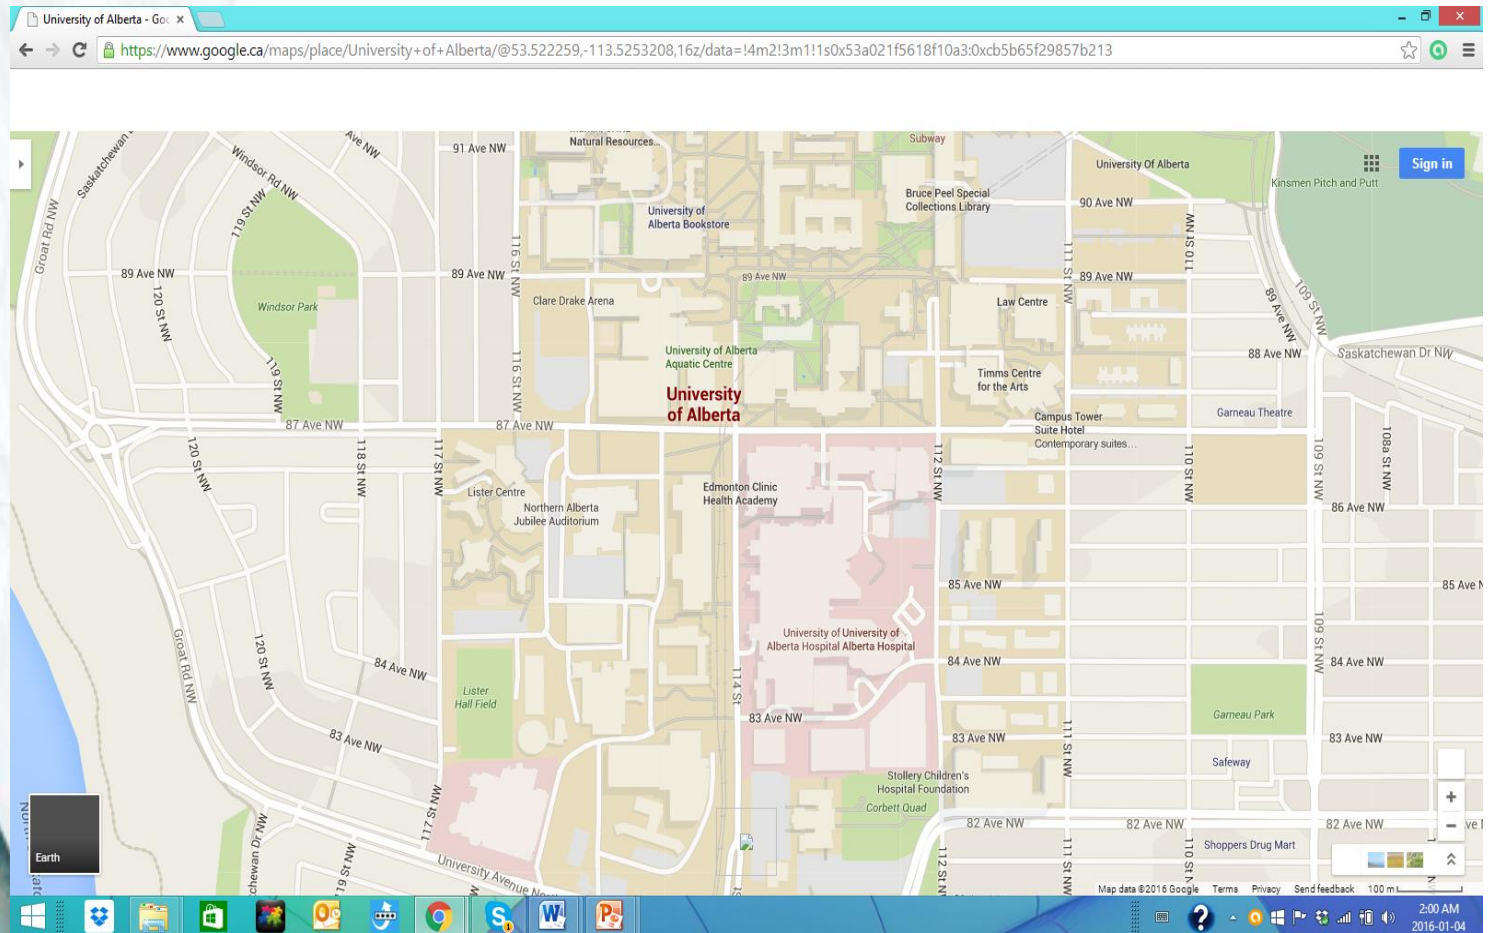

1 App is actually 2 Apps (1 is 2, 4)

- The CONTACT App is loaded onto the Contacts phone or PC and it RECIEVES data and locations from the USER App when activated.
 - This data can be forwarded to the RESPONDER or trusted Police forces..
- The Contact can cancel the Emergency.
- The Contact has security questions to test the USERS status.
- The Contact can find the USERS phone.

How they work (work 2)

USER APP

- App is installed onto Smartphones/Tablets and PC's and Profile is created.
- App constantly collects data that **COULD** be transferred.
- App controls the Phone once activated.
- App can be accessed via an **ICON**.
- **Keep the APP secret, choose your CONTACT wisely.**
- Profile is kept confidential until **NEEDED**.
- The **APP** collects critical data to **HELP** in your tracking and **RECOVERY**.
- Data is transmitted via **INTERNET** but notifications can be transmitted by **GSM**.

How they work (work 3)

- The **USER** has the App loaded on their phone, they complete their profile.
- When the **USER** needs **HELP** they access the App.
- Help is instantly contacted and certain predefined data sets are **AUTOMATICALLY** transmitted.
- **USER** location is revealed when needed.
- Several “Operational” Modes can be **created** are available and can be used when needed:
 - Incident Mode: Used when Danger is close or being observed.
 - Travel Mode: Used when travelling or in a risky circumstance.
 - Danger Mode: When the danger is real and happening.
- **RESPONDER** and **CONTACTS** receive notifications and data and respond in the **DANGER** mode.

How they work (work 2)

CONTACT App

- Is installed onto Contact Phones and PC's at no charge.
- USERs Profile can not be seen until USER is KIDNAPPED.
- App receives Alerts and data from USERS in ALERT and KIDNAPPED Modes.
- Data received from USERS can be forwarded to
